

NITHISH V

AI & ML student

 nithishvenkat4507@gmail.com  9976466119  LinkedIn  GitHub  LeetCode

SUMMARY

AI & Machine Learning student with experience in building data-driven systems using Python, Scikit-learn, and real-world datasets. Skilled in developing end-to-end ML applications and integrating intelligent features into practical solutions. Currently exploring Large Language Models (LLMs), prompt engineering, and their applications in explainability and automation. Seeking a technical internship to apply ML and LLM concepts in scalable systems.

EDUCATION

MSc Artificial Intelligence and Machine Learning, *Coimbatore Institute of Technology* 2024 – 2029
CGPA: 8.2/10

TECHNICAL SKILLS

Languages	ML & Libraries	LLM & AI Tools	Web & Backend
Python, R, C (Basics)	Scikit-learn, XGBoost, Pandas, NumPy	Hugging Face, OpenAI APIs (basic), Prompt Engineering	• Flask, Streamlit, REST APIs

PROJECTS

- Crypto Arbitrage Detection System**, *Tech: Python, Pandas, NumPy, APIs (crypto price data), Data Analysis*
- Developed a Python-based system to identify arbitrage opportunities in crypto markets using real-time **API data**
 - Modeled exchange rates as a graph and applied the **Bellman-Ford** algorithm to detect **negative cycles** representing profitable arbitrage opportunities
 - Designed a concept for **LLM-assisted** market insight summarization to convert raw trading signals into human-readable insights
- Geo-Hazard ML Prediction System**, *Tech: Python, Pandas, NumPy, Scikit-learn, Power BI, Flask, Streamlit*
- Built an ML model to predict seismic risk zones using **USGS & INFORM datasets**, performed EDA, preprocessing, and feature engineering to improve model performance.
 - Developed an interactive **web app** for real-time hazard prediction
 - Integrated an **LLM-based** interpretation layer to generate human-readable explanations of predicted risk levels
- Privacy-Centric File Management System**, *Tech: Python, Flask, Streamlit, REST APIs, SQLite, JWT Authentication Git*
- Developed a **secure self-hosted file management system** enabling complete user control over data without reliance on third-party cloud services.
 - Implemented **authentication and role-based access control** to ensure secure file storage and controlled access.
 - Built a **web-based interface using Flask** for seamless file operations including upload, retrieval, and management.

ACHIEVEMENTS & CERTIFICATIONS
